

Comparer des fractions

- Colorie en jaune les cases qui contiennent des fractions inférieures à 1.
- Colorie en bleu les cases qui contiennent des fractions égales à 1.
- Colorie en rose les cases qui contiennent des fractions supérieures à 1.

Comparer des fractions

- Observe les carrés et indique la quantité coloriée de chaque carré sous forme de fractions en complétant le numérateur et le dénominateur. Puis compare les deux fractions en entourant les signes $>$, $<$ ou $=$.

The image displays four comparison exercises, each consisting of a grid model and a bar model. The grid models are 10x10 grids with a vertical line at the 5th column. The bar models are rectangles divided into two parts by a vertical line, with the left part being 5 units wide and the right part being 5 units wide.

Exercise 1: The grid has 5 columns colored orange. The bar has 3 rows colored orange. Below the models are the symbols $\frac{\quad}{\quad} > \frac{\quad}{\quad}$, $\frac{\quad}{\quad} < \frac{\quad}{\quad}$, and $\frac{\quad}{\quad} = \frac{\quad}{\quad}$.

Exercise 2: The grid has 5 columns colored orange. The bar has 3 rows colored orange. Below the models are the symbols $\frac{\quad}{\quad} > \frac{\quad}{\quad}$, $\frac{\quad}{\quad} < \frac{\quad}{\quad}$, and $\frac{\quad}{\quad} = \frac{\quad}{\quad}$.

Exercise 3: The grid has 5 columns colored orange. The bar has 5 rows colored orange. Below the models are the symbols $\frac{\quad}{\quad} > \frac{\quad}{\quad}$, $\frac{\quad}{\quad} < \frac{\quad}{\quad}$, and $\frac{\quad}{\quad} = \frac{\quad}{\quad}$.

Exercise 4: The grid has 5 columns colored orange. The bar has 5 rows colored orange. Below the models are the symbols $\frac{\quad}{\quad} > \frac{\quad}{\quad}$, $\frac{\quad}{\quad} < \frac{\quad}{\quad}$, and $\frac{\quad}{\quad} = \frac{\quad}{\quad}$.

$$\frac{3}{10} \quad \begin{matrix} \textcircled{>} \\ < \\ = \end{matrix} \quad \frac{7}{100}$$

$$\frac{2}{10} \quad \begin{matrix} > \\ \textcircled{<} \\ = \end{matrix} \quad \frac{26}{100}$$

$$\frac{1}{2} \quad \begin{matrix} > \\ \textcircled{<} \\ = \end{matrix} \quad \frac{7}{10}$$

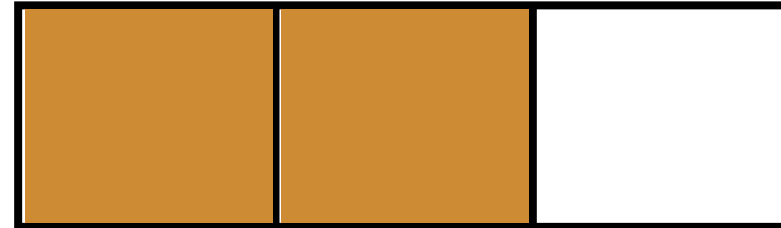

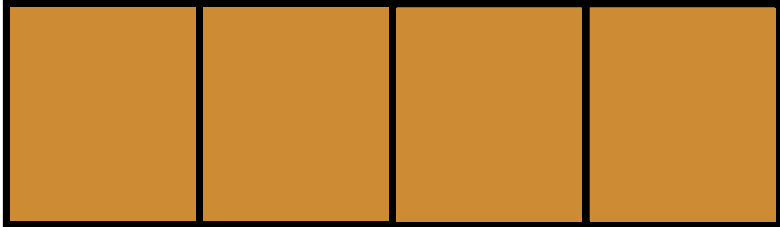

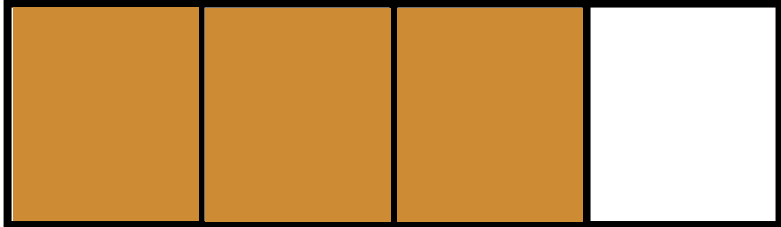

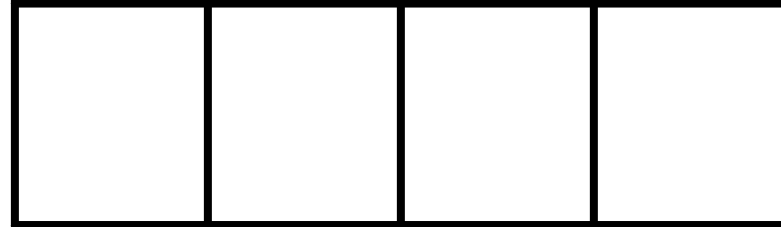

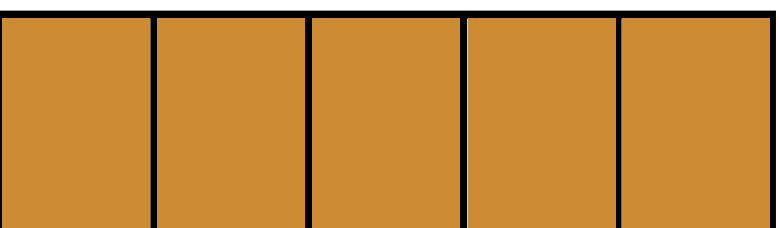

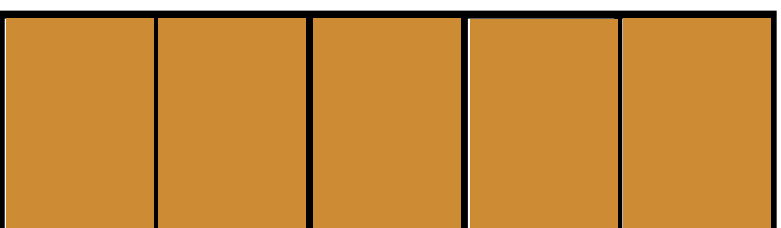

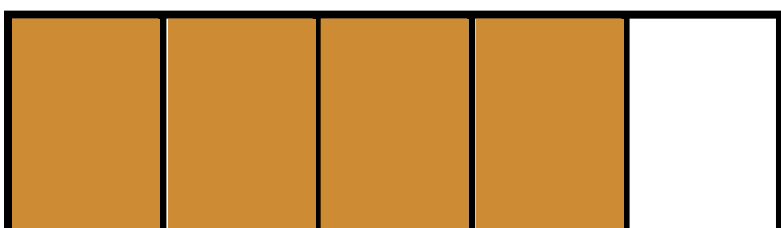

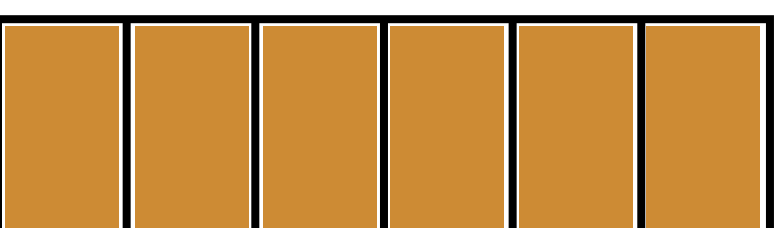

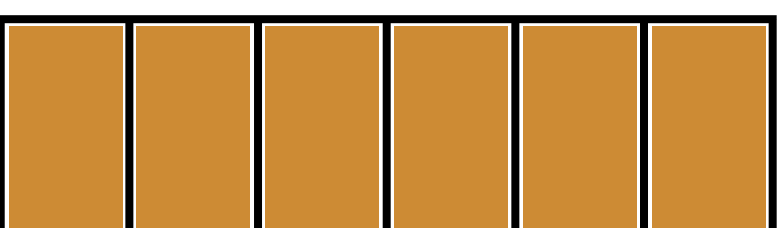

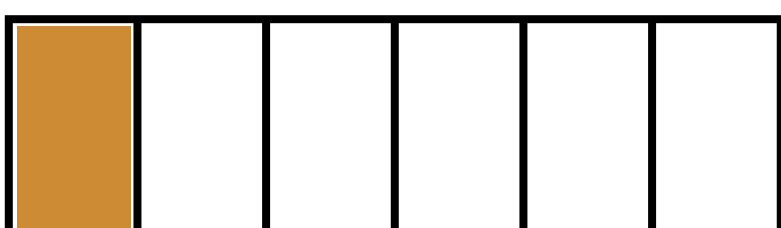

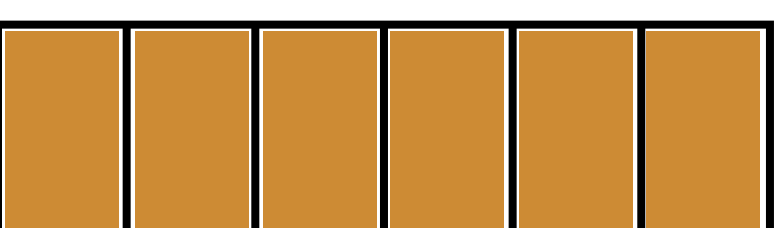

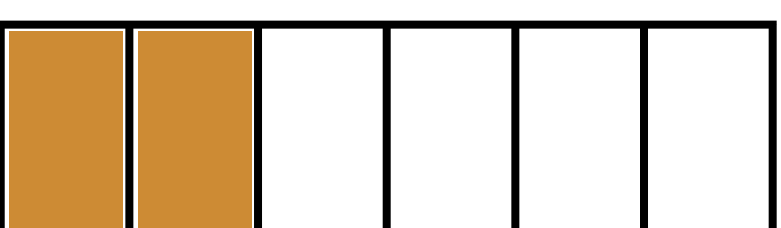

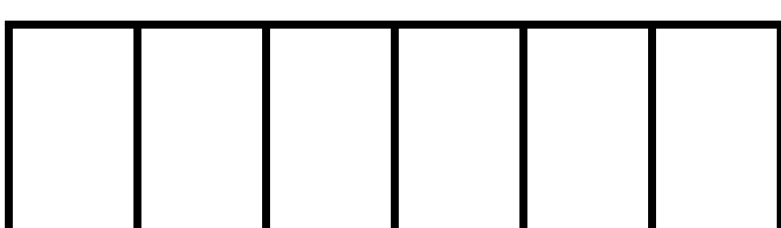

$$\frac{1}{2} \quad \begin{matrix} \textcircled{>} \\ < \\ = \end{matrix} \quad \frac{3}{10}$$

Décomposer des fractions

- A partir du modèle en vert, écrire la fraction correspondant à la quantité totale coloriée, puis écrire cette fraction sous la forme d'un nombre entier et d'une fraction inférieure à 1.

Exemple :  $\frac{7}{3} = 2 + \frac{1}{3}$ Pour t'aider, tu peux passer par une étape intermédiaire pour déterminer le nombre entier : $\frac{7}{3} = \frac{6}{3} + \frac{1}{3}$

			$\frac{\dots}{\dots} = \dots + \frac{\dots}{\dots}$
			$\frac{\dots}{\dots} = \dots + \frac{\dots}{\dots}$
			$\frac{\dots}{\dots} = \dots + \frac{\dots}{\dots}$
			$\frac{\dots}{\dots} = \dots + \frac{\dots}{\dots}$
			$\frac{\dots}{\dots} = \dots + \frac{\dots}{\dots}$

Corrigé

$$\frac{8}{3} = 2 + \frac{2}{3}$$

$$\frac{7}{4} = 1 + \frac{3}{4}$$

$$\frac{14}{5} = 2 + \frac{4}{5}$$

$$\frac{13}{6} = 2 + \frac{1}{6}$$

$$\frac{8}{6} = 1 + \frac{2}{6}$$
