

Carré

$$\begin{aligned}\text{Périmètre} &= c + c + c + c \\ &= 4 \times c\end{aligned}$$

$$\begin{aligned}\text{Aire} &= c \times c \\ &= c^2\end{aligned}$$

Rectangle

$$\begin{aligned}\text{Périmètre} &= l + L + l + L \\ &= 2l + 2L \\ &= 2 \times (l + L)\end{aligned}$$

$$\text{Aire} = l \times L$$

Triangle

$$\text{Périmètre} = a + b + c$$

$$\text{Aire} = \frac{b \times h}{2}$$

Cercle

$$\begin{aligned}\text{Périmètre} &= 2 \times \pi \times r \\ &= d \times \pi\end{aligned}$$

$$\begin{aligned}\text{Aire} &= \pi \times r \times r \\ &= \pi \times r^2\end{aligned}$$

Parallélogramme

$$\begin{aligned}\text{Périmètre} &= a + a + b + b \\ &= 2a + 2b \\ &= 2(a+b)\end{aligned}$$

$$\text{Aire} = a \times h$$

Losange

$$\begin{aligned}\text{Périmètre} &= c + c + c + c \\ &= 4 \times c\end{aligned}$$

$$\text{Aire} = \frac{D \times d}{2}$$

Trapèze

$$\text{Périmètre} = a + b + c + d$$

$$\text{Aire} = \frac{(a + c) \times h}{2}$$
